

About Me

[Startseite](#) / [About Me](#)

Biography

My name is Bastian Platz, and I took up programming in seventh grade on my own. At first, I used one or two books as references. Later, the books piled up.

I studied computer engineering at Technical University of Berlin. There, I earned my degree.

I gained many years of experience as a software developer in Berlin's startup scene. During this time, I constantly read international reference books to keep up with the latest news and trends.

Mission

Today, I want to help programmers with my products. These aspirations have been collected on my website:

Programmers' Needs.

Look around. Maybe you'll find something of interest.

Freelancing

I do freelancing on the side. I am an experienced senior full-stack web engineer.

Some buzzwords regarding that include the following:

- JavaScript, ES6+
- React.js / Redux
- Node.js
- Meteor.js

Contact

You can reach me here:

Bastian is a highly skilled developer. He is up to date on the latest features and is able to effectively implement them. Bastian is also very good with complex tasks and has implemented numerous re-usable components that have simplified our work.

Jirka Melichar, Director

Bastian is a very technic driven person and feels up-to-date with technical developments. The more complex the task, the more motivation he seems to get.

Dr. Jan Schächtele, Co-founder and CEO, Comatch GmbH

Bastian is a very intelligent, experienced and versatile software engineer and architect. His ability to understand structure and tackle solutions...

He does not fear any challenge or how few people have faced it. He delivered a solid solution...

I was particularly impressed by his ability in identifying any kind of potential before time. When raising a...

one sound plan for mitigation or even a better plan for the whole solution. Bastian is extraordinarily committed to his work and constantly performs in a very organized and transparent manner.

As his knowledge and experience is not limited to programming and software architecture, he brings a broad skillset which he constantly increases through disciplined self-learning in various cutting-edge fields.

A key factor for his and our success is his deep interest and very analytical understanding not only of technical challenges but the whole business we run. I'd like to describe him as the prototype of a network-thinker.

His friendly and calm nature and willingness to help make him very approachable, a great team player and a pleasure...
